DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Allan Fanucci on October 20, 2006.

The application has been amended as follows:

In claim 1 line 7, ...the wafers. ... has been changed to ...the wafers, wherein at least one flexible gripper member is configured in dimension to apply different degrees of elastic deformability in at least two locations.

Reasons for Allowance

2. Claims 1-23 and 31-36 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1 recites wherein at least one flexible gripper member is configured in dimension to apply different degrees of elastic deformability in at least two locations, in

Art Unit: 2829

combination with other limitations of the claim. Since claims 2-6, 15-16, 19-23 and 31-35 depend from claim 1, they are also allowed.

Claim 7 recites wherein at least one gripper member comprises a body generally in the form of a plate having different degrees of elastic deformability in at least two locations, in combination with other limitations of the claim. Since claims 8-14, 17-18 and 36 depend from claim 7, they are also allowed.

These features of the claims in combination with other elements are neither disclose nor suggested in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yanagita et al. (Us 6,521,078) discloses a "Sample separating apparatus and method, and substrate manufacturing method".
